Let's Start!

Let's review!

Learning Outcome

Understand actions, events, and experiences in present, past or future and in spoken or written texts and in work and social contexts.

Ask your partner:

- Have you ever broken a bone in your body? How did it happen?
- Do you have a high tolerance for pain? Explain.

Can Do Statements

- I can talk about what has happened or what I've done.
- I can talk about the reason of an action or an event.
- I can report statements.

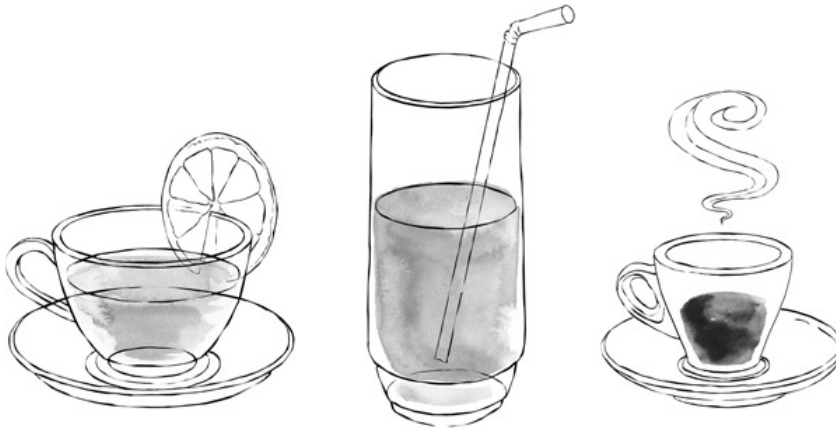

Let's Explore!

The **frailty*** of the human body.

* "Frailty" refers to the weakness and/or fragility of someone.

Instructions: Read the text aloud.

A Demanding Workload

Since the human body is frail, there seems to be no way to avoid the aches and pains associated with our daily workloads. It has been reported on numerous occasions that repetitive activities, no matter how apparently mundane, will eventually lead to injury. Seeing that modern humans work long hours, many end up with a wide range of ailments ranging from chronic neck problems to fatigue and tension. Most employees report having sought medical attention at one time or another.

Automation has already led to reduced workloads, and perhaps this will lead to healthier and longer lifespans. Maybe innovation in the way we do our jobs will allow us to live pain-free lives. We can't say for sure, though, because we don't know what the future holds. What we can do is focus on improving our current situation by paying attention to how we go about doing our jobs.

Experts strongly advise workers to find a release for their tension and stress. It is said that meditation can help, and more and more employees have been embracing mindfulness. Many employers have even suggested that employees attend mandatory meditation sessions. A number of professions have also been encouraging an increased focus on posture. Slouching is a dangerous habit, since it puts a huge strain on the spine. There's no shortage of solutions. Some professionals even see laughter and yawning as a way to reduce anxiety. If you've already tried everything, though, why not get a pet? It has been reported that owning a pet can vastly improve a person's well-being. Regardless, the first step to finding a solution is identifying that there is a problem. So if you've come to realize that your work may have a long-term affect on your health, you're already halfway there!

Let's Practice!

Our workload has been constantly increasing!

Instructions: Complete the sentences with the information that you are given. Read the complete sentences aloud. Check your pronunciation with your instructor.

you come to realize

have even suggested

has already led to

have also been encouraging

you've already tried

1. Many employers _____ that employees attend mandatory meditation sessions.
2. A number of professions _____ an increased focus on posture.
3. If _____ everything, though, why not get a pet?
4. So if _____ that your work may have a long-term affect on your health, you're already halfway there!
5. Automation _____ reduced workloads, and perhaps this will lead to healthier and longer lifespans.

Let's Practice!

Some remedies have been said to work well.

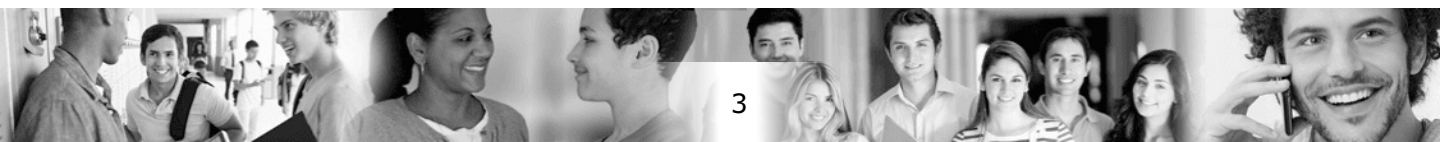

Instructions: Read the sentences. Match the sentence from Column A to Column B. Read the complete sentences aloud. Check your pronunciation with your instructor.

COLUMN A

1. It has been reported on numerous occasions that repeated activities,
2. Most employees report having sought
3. Experts strongly advise workers find a
4. It is said that meditation can help, and more and
5. Many employers have even suggested that

COLUMN B

- a. Release for their tension and stress.
- b. No matter how apparently mundane, will eventually lead to injury.
- c. Medical attention at one time or another.
- d. Employees attend mandatory meditation sessions.
- e. More employees have been embracing mindfulness.

Extension Activity

Create a book of home remedies.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Search online for "home remedies".
- Make a list of the five remedies that you think are the most useful or interesting.
- Create a small booklet explaining how each remedy works.
- Present your booklet to a partner.

Self-Assessment

Yes	No
☐	☐
☐	☐
☐	☐

I research health and wellness.

I write about various cures or remedies.

I present the information to a friend.

Target Words

- **ache** (noun): a pain that is continuous but not necessarily strong
e.g. Since the human body is frail, there seems to be no way to avoid the aches and pains associated with our daily workloads.
- **ailment** (noun): sickness or malady
e.g. Seeing that modern humans work long hours, many end up with a wide range of ailments.
- **fatigue** (noun): tiredness
e.g. These ailments range from chronic neck problems to fatigue and tension.
- **tension** (noun): the state of being strained or nervous
e.g. Tension is a growing problem in North America.
- **seek medical attention** (expression): to get help from a doctor or other medical professional
e.g. Most employees report having sought medical attention at one time or another.
- **mindfulness** (noun): the practice of being aware of your mind and body
e.g. It is said that meditation can help, and more and more employees have been embracing mindfulness.
- **posture** (noun): the position of the body, especially the back and shoulders, when standing or sitting
e.g. A number of professions have also been encouraging an increased focus on posture.
- **to yawn** (verb): to open the mouth wide and inhale air when tired
e.g. Some professions even see laughter and yawning as a way to reduce anxiety.
- **well-being** (noun): health or welfare
e.g. It has been reported that owning a pet can vastly improve a person's well-being.

Learning Points

Report Structures

You use *that*- clauses and *wh*- clauses to report statements and questions in indirect speech.

You use infinitive clauses and *-ing* forms to report statements, orders or questions in indirect speech.

You can use the Passive form to report events or situation in an impersonal way.

You use verbs like *suggest*, *learn*, *report*, *say*, *believe* or *rumor* in the Passive form to write or talk about impersonal reports.

You use reported speech to report statements or situations.

You use *that*- clauses to report someone else's thoughts or statements.

Example:

*Jo suggested **that I should go** exercise more.*

You use *wh*- clauses to report questions with *wh*- words like *why*, *when*, *what*, *who*, etc.

With *wh*- clauses, you normally use verbs like *ask*, *want to know*, *wonder* to introduce the clause.

Example:

*Jo asked me **when I was going** to exercise next.*

You use reported speech to report statements or situations.

You can use infinitive clauses to report someone else's thoughts or statements.

Example:

*He promised **to come** with us the next time.*

*She strongly advised me **not to miss** the next seminar.*

You use *-ing* forms to report actions. You sometimes need a preposition with some verbs.

Example:

*He **apologized for missing** the seminar.*

*He **recalled/remembered writing** the event down in his agenda.*

You can use the Passive form to report events in an impersonal way. The subject is not specific, but general.

You can use verbs like *suggest*, *learn*, *report*, *say*, *believe* or *rumor* in the Passive form to write or talk about impersonal reports.

Structure:

It+ Passive form + that ...

Example:

Learning Points

It is reported that too much overtime may be bad for your health.

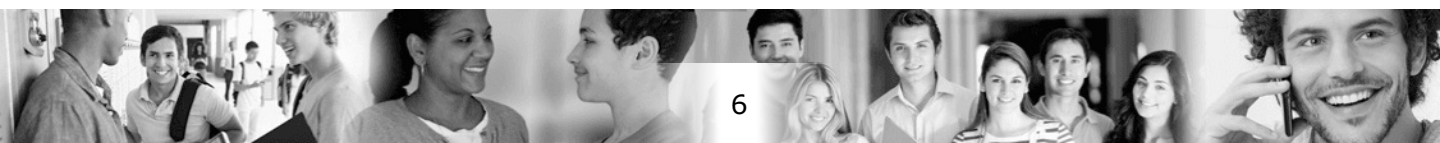

Subject + Passive form + to ...

Example:

He is known to be a very understanding manager.

Examples:

- *It has been reported on numerous occasions that repeated activities, no matter how apparently mundane, will eventually lead to injury.*
- *Most employees report having sought medical attention at one time or another.*
- *Experts strongly advise workers find a release for their tension and stress.*
- *It is said that meditation can help, and more and more employees have been embracing mindfulness.*

Learning Points

The Reason Clause

You use reason clauses to express the reasons for an action, or why a situation is the way it is.

You use words like *because*, *since*, *as*, *in case*, and *seeing that* to introduce a reason clause.

Reason clauses are subordinate to the main clause. They state the reason why things are done, or what makes a situation the way it is.

You can use the following words to introduce a reason clause:

Connector	Used to ...
because	to give a reason explaining why
since/as	to reintroduce a reason that is already known st
in case	to talk about a precaution you will take in advance
seeing that	to draw attention to a known situation
for, in that, insofar as, inasmuch as	to give a reason for something (in a similar way that because does)
because of, due to, owing to	to introduce a noun phrase that gives a reason for a situation

You can also use *-ing* clauses to express reason relationships between the main clause and the subordinate clause.

Example:

*We queued for over two hours, **hoping** to get tickets to the seminar.*

***Having** met the speaker personally, I can vouch for his enthusiasm.*

Examples:

- *We can't say for sure, though, because we don't know what the future holds.*
- *Slouching is a dangerous habit, since it puts a huge strain on the spine.*
- *Since the human body is frail, there seems to be no way to avoid the aches and pains associated with our daily workloads.*
- *Seeing that modern humans work long hours, many end up with a wide range of ailments ranging from chronic neck problems to fatigue and tension.*
